Pioneer® brand Maize Silage hybrid performance information

PIONEER® BRAND

P0891

Silage CRM 107

Reliable veteran.

A proven all-rounder.

- Very good drought tolerance, standability and staygreen combined with sound resistance to Northern Leaf Blight.
- Best suited to moderate to high yielding paddocks.
- Well adapted to high plant populations that should be adjusted to match yield expectations.
- When planting early into cold wet soils switch to **P0900** or **P0937**.

Delivers yield stability for silage, particularly in Northland.

CA	Commercially acceptable	★★★	Very highly significant yield advantage
★	Significant yield advantage		

[1] Positive drymatter differences indicate that the bolded Pioneer hybrid had a higher average drymatter percentage at harvest. Such hybrids are usually shorter in maturity than the comparison hybrid. Negative drymatter differences indicate that the bolded Pioneer hybrid had a lower average drymatter content at harvest. Such hybrids are usually longer in maturity than the comparison hybrid. Positive yield advantages indicate that the bolded hybrid was higher yielding.
